About This Game

Gray Memory is an instant entertainment game that tells a story about terrible memories. The story takes place in a rainy sky. The moon envoy takes his five stars to the sacred country to attend the ceremony. There is nothing to notice except the drizzle in the sky.

A few minutes later, however, a terrible monster appeared in the clouds ahead, with strange eyes and a grey tail waving. Four frightened stars fell one after another, and the first star lost its luster. It's like dying. It's struggling, blinking and telling itself that it can't sleep. The monster in front stared at the star as if it had been his prey. I don't know when the star has come to a closed space.....

Features and content of the game

There are various traps and buttons in the game. You have to solve these traps to get to the next level. This game has the characteristics of adventure and puzzle. It will help to develop your brain.
